Proprietary Name:

Hanson Medical Calf Implant

Common Name:

Silicone Carving Block

Classification Name:

Elastomer, Silicone Block

Hanson Medical Calf Implants are intended for augmentation, or as reconstruction to minimize muscular defects. The Hanson Calf Implant is carvable, allowing the physician to adapt the device shape to individual patient contours. They are manufactured using heat cured, medical grade, two part, liquid silicone system (LSR), silicones that meet FDA requirements for replacement of Dow's discontinued medical grade silicone analogues.

Hanson Calf Implants are substantially equivalent to itself (Hanson Medical Silicone Carving Block), and to the Calf Implants made by AART, Inc and Silimed LLC. Hanson Calf Implants employ the same materials, methods of manufacture, and are identical in dimension and very similar in others, to these predicate devices.

Hanson Calf Implants will be offered non-sterile. The implants will be packaged in autoclavable peel pouches labeled with a detachable traceability tab for patient record files. Autoclave sterilization details are provided in the package insert. The implants are finally boxed with package insert materials and labeled for shelving and shipping traceability.

Re: K030808

Trade Name: Hanson Medical Calf Implant Regulation Number: 21 CFR 874.3620

Regulation Name: Ear, Nose, and Throat Synthetic

Polymer Material

Regulatory Class: II Product Code: MIB Dated: March 5, 2003 Received: March 13, 2003

Dear Dr. Harrison:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and we have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the <u>Federal Register</u>.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (301) 594-4659. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its Internet address http://www.fda.gov/cdrh/dsma/dsmamain.html

Sincerely yours,

for Celia M. Witten, Ph.D., M.D.
